Plydesign

We do *care*

Plydesign is a Hungarian furniture brand established in 2014. Plydesign was born out of the desire to create excellent furniture design which contributes to the well-being of people. Care, consciousness and curiosity have been shaping the core of our design approach where the fusion of technology and material make our imaginations a reality – the enhancement of people's quality of life.

Tamás Babits, founder and managing director of Plydesign and **András Kerékgyártó**, head of design, share the same holistic view – design, according to them, is not merely about creating objects, but it is a matter of deep understanding of social and personal context, therefore a physical answer for real everyday problems. With this mindset, Plydesign has successfully found a way to bring about such an ecosystem where endusers, stakeholders, partners, employees and team members equally find solutions for their needs.

Shipping & *set-up*

7

Plydesign offers a smooth solution for the whole journey of the pieces. The chairs and tables come flat packed and easily assembled, in order to minimize the volume of the box and lower the ecological footprint. Due to the smart design, the set-up of chairs and tables do not consume much time and nerve by following manual included in the package.

FLEET *collection*

In order to fully engage in an activity, we need a clear and peaceful mind – FLEET collection gives the level of comfort which allows users to experience flow when listening to music, enjoying dinner with family or friends or concentrating on demanding intellectual tasks.

8

FLEET collection's name refers to the paradox of building a fleet in a landlocked country. A navy fleet alludes to the strength of a nation, in charge of different tasks to achieve. Our FLEET collection has a specific mission to accomplish as well: it has signed up for as an advocate of good design through creating furniture with the optimum ergonomics. As for ships, the collection rather employs furniture design; as for munition, it relies instead on the importance of knowledge and spirit enabling us to win actual everyday victories in the flow of resourcefulness and creativity.

Plydesign has developed a refined and subtle, yet long-lasting product family encompassing accuracy, precision and hidden details. FLEET collection is a result of an extensive research and product development whereby the best practices of ergonomics were integrated and applied, based on users' feedbacks. The product family offers the freedom of variability as the elements are designed in a universal way that the (legs, tabletops, shells and seat pans) are compatible with each other. Plydesign products are equally well suited to contract and domestic environment as they fully comply with all the relevant standards for stability and safety as well as surface resistance.

FRIGATE chairs

FRIGATE chairs

13

FRIGATE chairs

The FRIGATE family is considered as a strong design idiom which shows that responsible production and aesthetics can go hand in hand without any compromise in quality.

The chair's shell consists of two components: the backrest is made with the aid of 3D-Veneer technology, while the seat pan is produced through conventional moulded plywood process. The backrest, curved in all dimensions, provides an ideal support for the waist, along with its upper part and seat pan where the edges are bent in the opposite direction of the body in order to avoid cutting into the back and the thighs. The combination of old and new technologies enables us to offer an optimal seating comfort as other seats made entirely with 3D-Veneer, while making it available for a much wider audience.

The sublime silhouettes counterbalance the sturdy character of FRIGATE which is designed to withstand the course of time. FRIGATE can be customized with a broad range of material and leg combinations (with swivel base, with swivel base and castors, stacking, height-adjustable) according to personal needs – literally a natural choice to brighten up intimate spaces or grand halls with the inviting feel of wood. FRIGATE chairs are stackable up to 20 pieces – for that purpose, a trolley with handle is available in order to move them easily.

New product: Plydesign has implemented a new product development in form of an elevated chair which entails height-adjustable seat to find the ideal position, a footrest to improve circulation and blood flow as well as a star base to ensure stability. FRIGATE shell is compatible with the star base, in this way their subtle elegance applies when sitting next to a counter.

FLAGSHIP armchairs

FLAGSHIP armchairs

FLAGSHIP armchairs

FLAGSHIP armchair challenges contemporary furniture design by condensing the maximum comfort and timeless, fine appearance in a solid structure.

FLAGSHIP is a new take on the classic genre of armchair. The seat shell embraces gently the body providing sufficient support for the lumbar region, arms can be rested on a delicate lift at a perfect height, and the curved edges on the seat pan as well as on the back follow softly the lines of the thighs and back without cutting into them. The armrest and backrest form an inherent unity with the upholstery which conforms seamlessly to the composition.

A wealth of possibilities is at disposal when it comes to stylistic preferences – bases, legs (with swivel base, with swivel base and castors, stacking, height-adjustable) and shells are freely able to be combined as the joints of each parts are compatible with each other. FLAGSHIP is well suited to small, cosy milieu as well as to offices or restaurants thanks to its warm, welcoming delicacy.

New product: Plydesign has implemented a new product development in form of an elevated chair which entails height-adjustable seat to find the ideal position, a footrest to improve circulation and blood flow as well as a star base to ensure stability. FLAGSHIP shell is matching this type of leg, giving a splendid allure to the act of sitting at a bar or a counter.

SUBMARINE coffee tables

Designed by András Kerékgyártó

SUBMARINE *coffee tables*

A coffee table plays an essential role in the living room – a display for our art albums, candles or our treasured ceramic bowl filled with flavoury fruits. SUBMARINE with round or oval tabletop becomes a partner to the sofa or even to a FLAGSHIP armchair where we spend a cosy afternoon with our readings and a cup of tea at arm's length.

MOTHERSHIP tea tables

MOTHERSHIP *tea tables*

Tea tables may entail many functions – a furniture piece representing a quiet corner with familiar and aesthetic objects such as a table lamp, a vase with fresh flowers or the favourite diary with thoughts and creative writings inside. The MOTHERSHIP tea table is an elegant pedestal for light supper servings, adapting to different kind of spaces due to its wide range of available shapes and sizes.

Slowing down, having a cup of coffee or tea paired with a cookie and reading a magazine is a perfect way to relax. MOTHERSHIP tea table with metal base is a synergy of French bistro ambience and Scandinavian type of self-care a visual and physical break spending with yourself or engaging a meaningful conversation with a friend.

The tea tables come in two sizes, both with round and square tabletop. They are lightweight, but also very stable and sturdy at the same time.

MOTHERSHIP dining tables

Designed by András Kerékgyártó

The MOTHERSHIP dining table promotes nothing more than what it offers: simple tenacity and sublime hospitality. MOTHERSHIP displays openly the beauty and character of wood abstaining from any ornament which would distract the attention. Standing alone, or wrapped around by seated people, MOTHERSHIP remains a calming reference point in space, whether it is about connecting family and friends during lively dinners, unpacking groceries, or picking up your unfinished book or magazine.

Due to its minimalistic design, MOTHERSHIP dining table works perfectly in most interior styles. To enhance ambience and accentuate on maximum comfort, FLAGSHIP armchairs are recommended for larger type of MOTHERSHIP dining table (1600×900).

MOTHERSHIP tilting tables

Designed by András Kerékgyártó

MOTHERSHIP *tilting tables*

MOTHERSHIP tilting table adapts to the contemporary lifestyle which involves dynamic changing of settings in an interior or moving frequently. The tilting base allows public spaces to transform a place in an efficient way and to store a large amount of desks without problem.

The MOTHERSHIP office tables, available in two sizes – 1400 × 800 mm and 1600 × 800 mm – offer an ideal setting for office areas both for domestic and contract environments. The tilting base allows mobility in the workspace and efficient storage of multiple desks.

PARTNERSHIP conference table

Designed by András Kerékgyártó

PARTNERSHIP conference table

There are many different ways to make an impression – the invisible dynamics enter in motion at the moment when someone steps into a meeting room. PARTNERSHIP evokes quiet confidence which can serve as a foundation of ambiance in every meeting. The classic aesthetics, stringent lines along with the smooth surface revealing the woodgrain are soothing to the eye.

Sophisticated platform for presentations or meetings with the opportunity of built-in electrical outlets. PARTNERSHIP, due to its large size (2400 mm x 1000 mm) and central aluminium bases, can accommodate up to 8 FLAGSHIP armchairs.

SILURUS-PLY lamp

Professional LED lighting fixture for both ceiling and suspended ceilings. It has excellent reflection; direct, indirect, or an indirect radiant version. The body of the lamp is made of plywood which brings warmth and a piece of nature into any spaces. The SILURUS-PLY lamp is available both in American walnut and European oak.

Features:

Modul Flux: 3440 lm
Indirect: 860 lm
Color Temperature: 3000 K
Color Rendering Index >80
System Power Direct: 32 W
Power Supply: 230 V, 50 Hz

Optical system:

Lifetime: 50000 hours (L-70)
Lightsource: Osram LED modul

Structure:

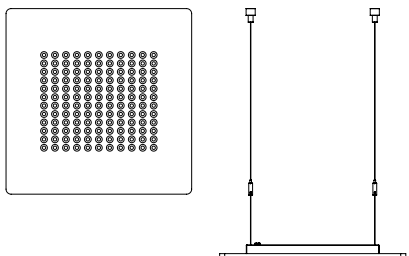

Passive cooling
Milled plywood
Protection: IP20

Options:

Color Temperature: 4000 K
Dimming: 1-10 V, DALI
Smartphone - Bluetooth
