MARO Office Furniture

For 30 years, we have been making sure that office work is comfortable and ergonomic. Our furniture demonstrates our professionalism and love for what we do. We are passionate about creating exquisite and functional things and that translates into a quest for new solutions that turn concepts into products at a higher and higher level. Using innovative engineering solutions, we strive for ensuring that our products are top-notch. Our quality has been proved by ISO 9001 and Geprüfte Sicherheit certificates. This is possible thanks to our technology park, where world-class techniques come together under one roof. As a responsible producer, we wish to minimize our ecological footprint and expect the same from our suppliers.

Our Machinery Park guarantees top quality and precision. Thanks to the investments in new techniques and constant search for unconventional solutions, we thrive all the time. We are aware of how valuable the human factor is, therefore some elements of our furniture are hand-made. Gluing the carcasses of curved counters is a job where the human has an advantage over the machine. However, where surgical precision and repeatability in short time are necessary, we take advantage of the latest technique. Wood processing center drills, mills and processes the edges with utmost precision. The quality of our furniture is based on hundreds of trials and tests, thanks to which we are certain that we are second to none

LEATHER

GLASS

Please note that natural materials - veneer, stone and natural leather are distinguished by its unique properties such as: color variation in one element, lining or irregular grain, micro cracks and holes. These are not their disadvantages, but advantages. They make elements made of natural components inimitable and decorative. Additionally, veneer is not resistant to heat and changes its color when exposed to sunlight. Such complaints will not be taken into consideration. If you order the product again, it may be different shade. The client takes note of this. More information can be found in „MARO furniture care and main tenance” manual.
