

PRO Lockers

MARO Office Furniture

For 30 years, we have been making sure that office work is comfortable and ergonomic. Our furniture demonstrates our professionalism and love for what we do. We are passionate about creating exquisite and functional things and that translates into a quest for new solutions that turn concepts into products at a higher and higher level. Using innovative engineering solutions, we strive for ensuring that our products are top-notch. Our quality has been proved by ISO 9001 and Geprüfte Sicherheit certificates. This is possible thanks to our technology park, where world-class techniques come together under one roof. As a responsible producer, we wish to minimize our ecological footprint and expect the same from our suppliers.

Our Machinery Park guarantees top quality and precision. Thanks to the investments in new techniques and constant search for unconventional solutions, we thrive all the time. We are aware of how valuable the human factor is, therefore some elements of our furniture are hand-made. Gluing the carcasses of curved counters is a job where the human has an advantage over the machine. However, where surgical precision and repeatability in short time are necessary, we take advantage of the latest technique. Wood processing center drills, mills and processes the edges with utmost precision. The quality of our furniture is based on hundreds of trials and tests, thanks to which we are certain that we are second to none

PRO Lockers

PRO lockers are made up of modules with sizes customizable in 10 mm increments: height adjusted from 300 mm to 2000 mm, width from 300 mm to 600 mm, depth from 350 to 600 mm. Modules of different heights are stacked on one another and form a column. The modules in one column must be of the same depth and width. Carcass height determines the number of compartments. 2000 mm high carcass must be equipped with at least 2 compartments and can be equipped with 6 compartments at maximum. The smallest carcass height which allows to form 1 module with 1 compartment is 300 mm. The front can be different color than the carcass. Each front can be different decor. Standard front can be replaced with a front with a posting slot and a shelf for mail.

STRUCTURE

- Chipboard coated on both sides with melamine resin with increased durability - 1st class.
- Chipboard with reduced formaldehyde emission, E1 standard.

CARCASS

- Carcass, top, floor and fronts made of 18 mm thick board as standard finished with 2 mm thick ABS plastic edge with 3 mm radius.
- Locker carcasses are factory-glued, assembled and delivered as a whole.

BACK WALL

- 8 mm thick back wall recessed into the groove between the sides of the sideboard. 18 mm thick back wall as an option with a surcharge.
- Back wall is coated on both sides with melamine resin, thanks to which it can stand independently.

ADDITIONAL INFORMATION

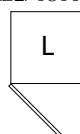

- Modules deeper than 420 mm (including 420 mm deep) can be used as self-standing.
- Colors according to MARO offer p. 154
- Each front can be different decor.

Front opening

Please note the product code when choosing lockers. The code determines opening direction. Letter L as the third digit in the code means that all the fronts open to the left and R - to the right side (examples below).

Option 1

e.g. L2LF030035100

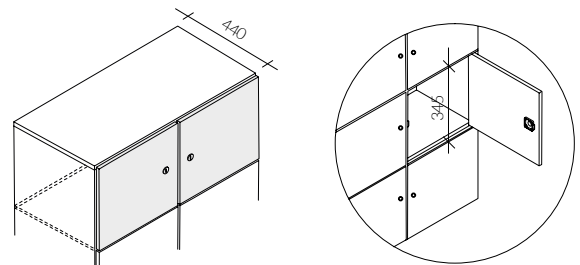

Option 2

e.g. L2RF030035100

SHELVES

- Shelves made of 25 mm thick board in the color of the carcass finished with 2 mm thick ABS plastic edge with 3 mm radius.
- 18 mm thick board shelves (behind the front with a posting slot) in the color of the carcass finished with 2 mm thick ABS plastic edge with 3 mm radius are equipped with a safety mechanism preventing shelf pull out.

EQUIPMENT

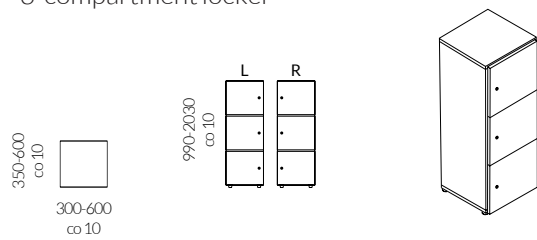

- Locker fronts are equipped with a one-point dead bolt lock with a removable cylinder. The lock can be located on the left or right side - to be selected when ordering.
- Other locks available with a surcharge (p.145).
- All doors are equipped with 110° hinges with a soft close automatic mechanism.
- The top and floor of the module are equipped markings facilitating joining modules. The side walls feature 2 markings at the top and 2 at the bottom to facilitate joining the columns.

PRO Lockers / Equipment

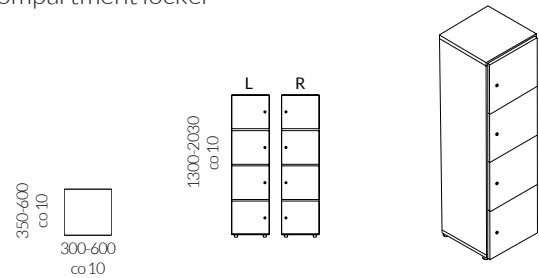

PRO lockers are made up of modules with sizes customizable in 10 mm increments: height adjusted from 300 mm to 2000 mm, width from 300 mm to 600 mm, depth from 350 to 600 mm. Modules of different heights are stacked on one another and form a column. The modules in one column must be of the same depth and width. Carcass height determines the number of compartments. 2000 mm high carcass must be equipped with at least 2 compartments and can be equipped with 6 compartments at maximum. The smallest carcass height which allows to form 1 module with 1 compartment is 300 mm. The front can be different color than the carcass. Each front can be different decor. Standard front can be replaced with a front with a posting slot and a shelf for mail.

EXEMPLARY MODULES

EXEMPLARY SETS

Lockers are equipped with a one-point dead bolt lock with a removable cylinder as standard. Another solution can be selected with a surcharge. Removable cylinder enables quick and easy replacement if the key is lost. Reduces the cost of servicing the locker.

The quick cylinder replacement reduces the risk of access by unauthorized persons in the event of a lost key.

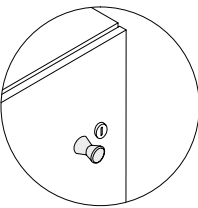

A wide range of locker personalization

Possibility to modify the colors of the locker fronts.

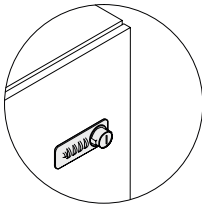

The drop box function reduces the costs related to document flow. Perfect for hybrid solutions in the office.
