

SURF

Ride a crest of a wave

narucas

An inspiring design

The first impression is always important. SURF will definitely stand out from the crowd thanks to its main distinctive feature – an appealing backrest silhouette resembling a windsurfing sail. A unique shape combined with a palette of vivid colours will create a dynamic atmosphere, boost productivity and bring waves of fresh ideas to your office.

The backrest and lumbar support of the SURF task chair were created by the German designer Justus Kolberg. Justus is known for creating products that are in balance with the human form and are able to provoke emotions. Having these aspects in mind - SURF is not an exception. This chair is a perfect blend of excellent design and undeniable sitting comfort.

The designer has received numerous awards including the IF Hannover Design Award, the Red Dot Design Zentrum NRW, the IDEA Gold Award and the Japanese Good Design Award.

*„Design combines simplicity,
elegance, modernity and comfort.“
Justus Kolberg*
